

Jr. GEMS--2010

Today we began to learn about object-oriented computer programming with the free downloadable program called Scratch, designed by engineers at MIT to help kids enjoy computer programming.

This is a wonderful fun program that we use in McNair's Design and Engineering Lab.

Here are some Web links so that you can download it and have more fun at home.

<http://scratch.mit.edu/> Download the program here.

<http://scratched.media.mit.edu/> -- a site for instructions and parents

<http://scratch.redware.com/> --more places to learn Scratch
